

# Electronic Prescription

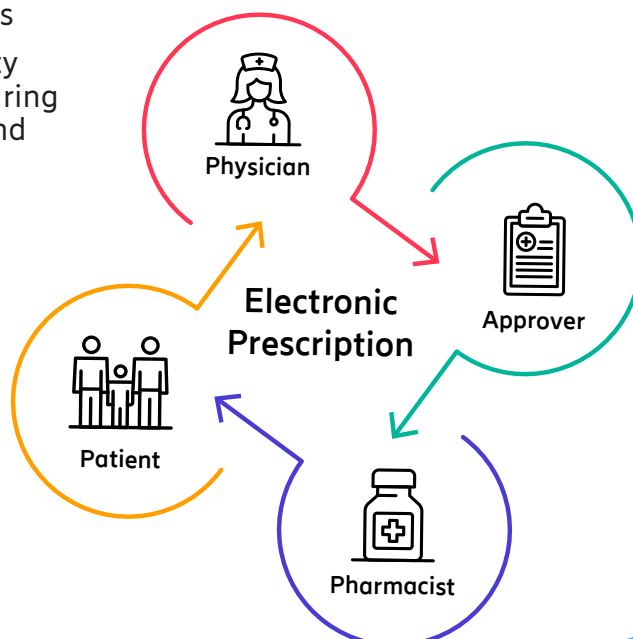

In modern healthcare systems electronic prescription offers an efficient and convenient way of medication prescribing and dispensing for both patients and healthcare professionals. Electronic prescribing enhances the safety and quality of the prescribing process.

## Benefits:

- End-to-end solution enabling electronic medication prescribing and dispensing
- Standard interfaces enabling fast integration into existing healthcare ecosystems
- Adaptable to market-specific business processes
- Out-of-the-box support for international terminologies and classifications
- Extensible security mechanisms ensuring patient privacy and secure access to medical data

## Key features:

- HL7® FHIR®-based standard APIs
- Configurable state machine
- Role-based access control with OAuth 2.0 and OpenID Connect

Electronic Prescription is based on the comprehensive, innovative, and proven **Electronic Healthcare Exchange (EHE)** product portfolio.

## Electronic Healthcare Exchange is a

line of products fulfilling a variety of eHealth system needs, ranging from fundamental ones like infrastructure/security/integration, over exchange and management of clinical documents and discrete medical information, to advanced functionalities like clinical decision support.

Solutions made of different **EHE products**, alone or through integration with existing infrastructure, support a wide range of processes in the healthcare system.
